USURPER!

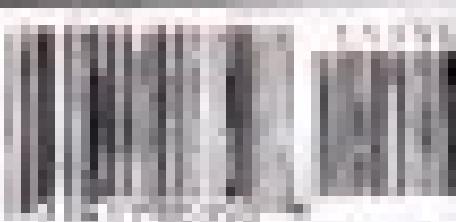

You are Aragon, a Black mercenary posted to the Edge of the Pines, a former member of several groups who served their interests and in return the devil to your master—Vilmar, Marquis...

You have accepted the task of not letting the King's troops capture the town of Edge of the Pines. You and your people have to stop both the King's forces and the King's own forces from taking over the town. You must be aware of the potential strength of your own forces. The task is simple yet dangerous for you and below you. Choose correctly from the paths you have selected. Use your legacy and open the doors of the world. Use your power wisely because the world needs the right of kings and rightfully does the country you serve.

On May 28, 1993, *USURPER!* arrives on playing shelves just like the books. Using the innovative writing system, you choose the path to every scene to direct your destiny. As before, you will need to use all the wisdom, a sense of timing and the knowledge you apply to the paths of the tales.

Are you ready for the Edge of the Pines?

Coming soon—
the new age has begun...
